ABSTRACT

To meet the needs of librarians and others for information on libraries in Wisconsin, Part I, a statistical section divides institutions according to control - whether public or private - then by type of institution, and then lists institutions alphabetically. Part II, an academic library directory, lists the name of the institution, address, control type, name of library director, name of person in charge of interlibrary loans, telephone number, and year library was established. Part II serves as an index to Part I. (AB)

INTRODUCTION

Wisconsin Academic Library Service Record, 1970

This is the first edition of an Academic Library Service Record for Wisconsin. It is one of several being produced by the Division for Library Services to meet the increasing need of librarians and others for accurate, current information about all types of libraries in the state. The long-established Public Library Service Record will again be issued; and in addition there will be a School Library Service Record and a Special Library Service Record.

The Academic Library Service Record has two main parts. Part I, a statistical section, divides institutions according to control - whether public or private - then by type of institution, and then lists institutions alphabetically. Under public institutions, there are seven types: Universities (including the University Branch Campuses at Kenosha, Manitowoc, Marinette, Racine, and Fox Valley), University Center System, University Extension, State Universities, State University Branch Campuses, County Teachers' Colleges, and Vocational, Technical, Adult Education Schools. Under private institutions there are five types: Liberal Arts Colleges and Universities, Theological Seminaries, Junior Colleges, Technical and Professional Schools, and Schools of Nursing. Part II, an academic library directory, lists the following: name of institution, address, control (public or private), type, name of library director, name of person in charge of interlibrary loans, telephone number, and year library was established.

Part II serves as an index to Part I. In Part II, institutions are listed in alphabetical order; note whether the entry you seek is public or private, and what type it is; go then to Part I, where the entry may be easily located.

ADDITIONAL NOTES: The information given in this Service Record was taken from either a revised 1969/1970 Higher Education General Information Survey (U. S. Department of Health, Education, and Welfare, Office of Education); from a Vocational, Technical, Adult Education Library Report, 1970; or from a Special Library Report, 1970. The latter two survey forms were distributed by the Division for Library Services.

If a column entry is blank, the information was either not supplied to us by the reporting library, or was not otherwise available to us.

Data concerning library collections and institutional and library expenditures are for the 1969/1970 fiscal year. Data on staff and enrollment are for fall term 1970 unless otherwise indicated.

INSTITUTIONAL DATA

Total institutional operating expenditures include expenditures for general and educational purposes, including funds for organized research.

Enrollment figures for voc-tech-adult education schools are for fulltime programs and do not include the enrollment figures for the many evening classes offered in these schools.

LIBRARY OPERATING EXPENDITURES

Salaries include the total salaries, before deductions, of all regular library staff.

Total library operating expenditures include expenditures for salaries, before deductions; salary equivalents of contributed-service staff; wages of students and other hourly assistants, before deductions; expenditures for books and other library materials; expenditures for binding and rebinding; and other operating expenditures (including replacement of equipment and furnishings, but excluding all capital outlay).

LIBRARY COLLECTION

A volume is defined as a physical unit of any printed, typewritten, handwritten, mimeographed or processed work contained in one binding, or portfolio, hardbound or paperbound, which has been classified, cataloged, or otherwise prepared for use.

A periodical is defined as a publication issued in parts that usually contain articles by several contributors. It generally has a distinctive title and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period.

Microfilm was reported by number of reels.

Other forms of microtext were reported by number of physical units.

LIBRARY STAFF

F.T.E. (Full-Time Equivalent) is computed by adding the number of hours worked in a typical week by all regular part-time staff and dividing this total by the number of hours in the full-time work week. This number is then added to the number of full-time staff members.

Production of the Service Records – Academic Library, Public Library, School Library, and Special Library – is this year an activity funded by Title III, Library Services and Construction Act. Inquiries and suggestions are welcome, and may be directed to the undersigned.
